

## Tiny Whoop Class

The Tiny Whoop class produces an aircraft that is small, fast, and maneuverable.

# 309g

These aircraft offer a very unique and fun filled racing experience for both pilots and spectators alike.

**Battery:** 1s Lipo Maximum

**Propellers:** 31mm Maximum

(Must be completely surrounded by covers or ducts)

**Motors:** Brushed 6mm Maximum

**VTX:** 25mw Maximum

**Weight:** 309g Maximum

## Tiny Whoop Gates

- Open gate area must be 361 square inches or less.

# MAX

These aircraft are perfect for backyard competition or practice for your larger racing drones.

In terms of safety, these aircraft present slightly more risk due to their speed and exposed propellers. Therefore it is advised that more precautions are taken such as clearly marked flight lines.

**Battery:** 2s Lipo Maximum

**Propellers:** 66mm Maximum

**Motors:** Brushed or Brushless

**VTX:** 200mw Maximum

## Micro Class Gates

- Open gate area must be 6.25 square feet or less.
